

**We're not afraid of water, caustic foams or crud.  
And we can do it all day long without lubrication  
or corrosion. Plus, we GUARANTEE 4-8 times the  
life against stainless bearings and flange blocks.**

**Technical Ceramics  
In Motion**

# CERAMICSPEED

**THE FUTURE IS HERE...**

**Silicon Nitride Balls are Harder/Smother/More Round and Less than 40% the Weight of Comparable Steel Balls**

**Lower Coefficient of Friction and Lower Operating Temps mean Extended Lubrication Life**

**Chemically Inert/Electrically Insulated**

**Lower Weight/Lower Friction means up to 50% Faster Speeds Using less Energy**

**Corrosion-resistant and heat-stable AISI 440C or AISI420 stainless steels.**

**High Temp/Chemically Inert PEEK Retainer**

# CORROTEC

Can Run DRY with SLT
